<sup>[2]</sup>Lecturer of Informatics Departement, Pembangunan Jaya University.

Professional work is one of the most important activities for students to carry out in gaining experience working in the industrial world. Therefore, after students graduate from university, there is no need for difficulties in doing jobs in the industrial world. At this time the professional work was carried out at the company PT. SARANA VETERINARIA JAYA ABADI. Professional work activities start from March 20 2022 to May 31 2022 which will be carried out under WFH. In the implementation of professional work, executors have jobdesk as backend developers in building company profile websites and product catalogs using the Laravel 9 framework. Executors with jobdesk backend developers have the responsibility to build websites so they can run online on servers and design and build database systems, logic programming, modules and features available on the website. The result of this professional work is the establishment of a company profile website and product catalog for PT. SARANA VETERINARIA JAYA ABADI.
