### **IMPLEMENTASI FITUR EMPLOYEE HUB PADA SISTEM ABSENSI DI PT. ASERIES INFORMIX SOLUSI TEKNOLOGI**

*PT Nakama Id is a start-up that has a focus on connecting potential start-ups and various investors by providing various educational platforms. Practitioners carry out Professional Work (KP) activities at PT Nakama Id from March 1 2023 to September 1 2023 or the equivalent of six months. While carrying out these activities, the practitioner is assigned to the Information Technology team in the Back-end Developer section to complete various projects, one of which is the creation and development of a website-based employee hub feature included in the Nakama Id attendance system. The employee hub is a feature that functions to view various information related to the entry and exit attendance of all employees. Through this feature, it is hoped that it will make it easier for all employees, especially human resources, to recap attendance every month. The results of this employee hub feature are going well according to the directions and designs previously assigned by the external supervisor. Apart from that, practitioners also gain various knowledge, skills, experience and the ability to adapt and be sensitive to changes in the industrial world.*

**Keywords:** *Nakama Id, Kerja Profesi, Employee Hub*
