Supervision and job satisfaction are factors that can affect the work discipline of employees of PT Visindo Dwi Warna. To prove the effect of both, this research was conducted. This study aims to determine the effect of supervision and job satisfaction on employee work discipline. The research method used is a survey method with a quantitative approach and data collection through questionnaires distributed to 60 employees of PT Visindo Dwi Warna. The data that has been obtained will then be processed using multiple linear regression analysis methods. The data analysis technique used in this study uses probably sampling technique.
