Reptiles are a group of cold-blooded vertebrate animals that have scales covering their bodies. Snakes are presented with accurate illustrations and clear descriptions of their habitat, behavior, diet, and distinctive characteristics. The book also provides relevant safety and care tips to assist reptile owners in properly caring for their pets. The research methods used involve literature review, interviews with the Chairman of the Reptile Community in Tangerang, and field visits to observe snakes directly. The data and information obtained are utilized to create accurate and captivating illustrations, as well as to compose content that is easily understood by the community in the Tangerang area.

Keywords: *illustrative book, reptile, snake, reptile community, Tangerang.*
