PROFESIONAL WORK ACTIVITIES IN THE INVENTORY AND ASSET MANAGEMENT REGIONAL JAKARTA AT PT TELKOM AKSES

This professional work activity is designed to develop students' understanding, insight and skills to complement the competencies they acquire in lectures. This professional work is carried out at PT Telkom Access in the Jakarta Regional Inventory & Asset Management unit.

PT Telkom Akses (TA) is a subsidiary of PT Telkom which was established on December 12, 2012. PT Telkom Akses was established to support the accelerated development of fiber optic networks and modernization of copper to fiber networks.

While carrying out professional work at PT Telkom Access, the practitioner works under the supervision and guidance of the Jakarta Regional Inventory & Asset Management. Practitioners have the opportunity to participate in the Material Inventory unit. The task of the Inventory unit is to analyze material usage volume data to forecast future product demand, determine the right level of inventory stock to meet field operational demands and minimize the cost of purchasing goods, ensure inventory is stored, organized and maintained properly, and carry out analysis of available stock, material expenses, inventory costs, and inventory performance.
