ManGO Mobile Application Development for Internal Employees of Mandala Multifinance, Tbk

Throughout the internship period carried out at PT Mandala Multifinance Tbk, The intern work as a Frontend Developer under the supervision and guidance of a Tech Lead. During the implementation of this internship, The intern have the opportunity to participate and be involved in developing the Mantis GO (ManGO) application. ManGO is an android-based mobile application specifically for internal employees of PT Mandala Multifinance, Tbk. The development that has been done by the intern is the addition of an e-wallet feature. Employees who use the ManGO application are Marketing Area Executives (MAX). MAX's job is to find a database to be used as prospect data in order to achieve his personal sales booking target. MAX will get commissions for every consumer data obtained. The amount of commission earned can be seen in the e-wallet on the ManGO application, and can be disbursed to each account.

Keywords : *Frontend Developer, e-wallet, Marketing Area Executive, commission*
