### **MIGRATION AND IMPLEMENTATION OF PROCUREMENT BUSINESS PROCESSES TO THE ODOO APPLICATION AT PT. JAYA TEKNIK INDONESIA**

*During the professional work at PT Jaya Teknik Indonesia, Practitioners work under the supervision and guidance of the IT Support and Migration division. In the professional work, Practicum had the opportunity to participate and be directly involved in the implementation of making flowcharts for the procurement business process in the requisition module to the inventory module in the Odoo application at PT. Jaya Teknik Indonesia with three types, namely Internal Transfer, Purchase Order and Foreign Purchase Order. In addition, Practicum also helped migrate data from the company's old system, Epicore, to its current new system, Odoo. From all these activities, it can be a reflection that PT Jaya Teknik Indonesia continues to do their best during their move to using this new system, to speed up and support the ongoing business processes.*
