IMPLEMENTATION AND CERTIFICATION OF ISO/IEC 27001: 2022 FOR ROICIAL BANK (Case Study: BPR Abadi)

While carrying out professional work at PT Skypro Manajemen Teknologi, Practitioners work under the supervision of Senior IT Consultants. In professional work, practitioners have the opportunity to participate and be directly involved in the implementation of the ISO / IEC 27001: 2022 implementation and certification project at BPR Abadi. Practitioners are tasked with identifying the needs and technical problems faced by clients, analyzing and evaluating documents according to ISO 27001 standards, conducting gap analysis of client documents related to ISO 27001 standards, creating SoA documents, SMKI Plans, and other documents that have not been implemented, discussing with clients regarding documents and policies that still need to be improved in an effort to improve. The ISO 27001: 2022 implementation and certification project at BPR Abadi aims to improve data security and protection in accordance with international standards.
