

ABSTRACT

Abdullah Khairuddin Noor (2020081004)

ANALYSIS OF THE ACADEMIC EVALUATION SYSTEM BASED ON OUTCOME BASED EDUCATION (OBE) AT DEVELOPMENT JAYA UNIVERSITY.

Outcome Based Education (OBE) is a curriculum or education method that focuses on the results or achievements of the learning process rather than just pursuing achievements in terms of learning materials that will be developed at Pembangunan Jaya University (UPJ). The reason this system was developed is because UPJ still uses the old curriculum system, so curriculum transformation is needed to adjust and adapt to the latest Higher Education Standards (SN-Dikti). Here, interns carry out professional work in the Information, Communication and Technology (ICT) unit at Pembangunan Jaya University from July 19 2023 to October 16 2023 which lasts for approximately 3 months. Practitioners are given the responsibility to carry out OBE system analysis in the form of diagram modeling such as Use case diagrams, Use case specifications, Class diagrams, Activity diagrams and Sequence diagrams. Practice using several applications to help work on this project such as Drawio, Microsoft Word and Microsoft Teams.
