INTERIOR DESIGN PROCESS AND HOW TO PRESENT IT IN A FORM OF TECHNICAL DRAWINGS AT CV. PURI DESAIN INDONESIA

Professional Work (KP) is an activity that aims to provide students with a comprehensive picture of the world of work. Professional Work (KP) helps students equip themselves to face the real world of work with knowledge and experience that cannot be obtained from a lecture environment. Therefore, Pembangunan Jaya University (UPJ) makes Professional Work (KP) activities an obligation that must be fulfilled by its students.

Architecture as a complex scientific discipline always intersects with various other scientific disciplines (Mashudi, 2019). While undertaking professional work at CV. Puri Design Indonesia, Practitioners are entrusted to complete tasks in the form of interior technical drawings and interior designers. From carrying out assignments in the interior field, interns can learn about the process of designing and planning a space and how to present it in the form of communicative technical drawings.

Keywords: *interior design, technical drawing, visual communication*
