UI/UX DESIGN OF A WEB-BASED RCN APPLICATION AT PT. DIGITALA INDONESIA GLOBAL

PT. Digitala Indonesia Global is a start-up company in Indonesia which operates in the information technology sector in Jakarta. Digitala offers several high qualityservices to organizations ranging from small, medium to large organizations. Digitala believes that IT can have a significant impact on business continuity. Whencarrying out professional work, practitioners join the IT Development division as Fullstack Developers. Practitioners are given the responsibility to take part in designing the UI/UX of the web-based RCN application using Figma at PT. DigitalaIndonesia Global. The RCN application was created to assist researchers in calculating a patient's CVD risk and calculating disease aggregates.

Keywords: *planning, UI/UX design, web*
