

ABSTRACT

Rakha Aliftyan Putra (2020081024)

PENGEMBANGAN FRONT END PADA APLIKASI RCN PERUSAHAAN XYZ INDONESIA BERBASIS WEB

Professional work is a job or activity that requires a certain level of expertise as well as knowledge and skills in a particular field. Professional Work (KP) at Pembangunan Jaya University is one of the main pre-requisites for students to complete their undergraduate studies. Professional work is carried out outside the campus by students after having sufficient scientific provision during their lectures. Therefore, Pembangunan Jaya Information Systems students take several opportunities by trying to carry out internship activities at one of the companies. The purpose of this professional work itself is for students to gain experience in the real world of work and implement the lessons learned college into the work field. The author himself carried out this professional work activity at a software house company called PT Digitala Indonesia Global. PT Digitala Indonesia Global is a company engaged in application development services or software development or commonly referred to as a software house company. The author joined the IT Division which was assigned by the company in terms of making web-based applications for clients of PT Digital Indonesia Global. The author was assigned to become a software developer for Front End Development on the Web-Based RCN Application of XYZ Indonesia Company.

Keywords: *Professional Work, software house, front-end, development*
