WEBSITE DESIGN DEVELOPMENT UI/UX COMPANY PROFILE AUTOMATIC FINGERPRINT IDENTIFICATION CENTER POLRI BARESKRIM SYSTEM

AUTOMATIC FINGERPRINT SYSTEM IDENTIFICATION CENTER (Pusinafis) which is part of the Criminal Investigation Agency of the Republic of Indonesia Police (Bareskrim Polri). This website aims to introduce Pusinafis to the public, provide information regarding the services and programs provided, and increase interaction with the public.

The development of this website involves the stages of needs analysis, interface design, system development, as well as testing and evaluation. Needs analysis activities include stakeholder identification, competitor analysis, and formulation of website objectives. Furthermore, the interface design is based on user-friendly and aesthetic design principles that are in line with Pusinafis' identity. System development is carried out by utilizing the latest web technology to ensure optimal performance, security and responsiveness. Finally, testing and evaluation involves gathering feedback from users to ensure compliance with user expectations and needs.

In this professional work, practitioners gain trust to develop the Pusinafis Bareskrim Polri website. Practitioners are involved in website development starting from the stages of problem analysis, needs analysis, wireframe creation to website prototyping.
