This research aims to determine whether there is an influence of Operational Costs-Operational Income (BOPO), Capital Adequacy Ratio, and Loan To Deposit Ratio on the Return On Asset Ratio of State-Owned Banks. The population of this research is state-owned companies listed on the Indonesia Stock Exchange (BEI) in 2013-2022, with a total sample of 40 samples obtained based on purposive sampling. The analytical method used is the panel data regression analysis method with data processing using Eviews 10 software. Based on the research results it can be concluded that there is a partially significant influence between Operational Expenses-Operational Income on Return on Assets, there is a partially significant influence between Capital Adequacy Ratio on Return on Assets, and there is no partially significant influence between Loan to Deposit Ratio on Return on Assets.

Keywords: *Operational Costs-Operational Income, Capital Adequacy Ratio, Loan to Deposit Ratio, Return on Asset Ratio*
