### **AKTIVITAS RISK ANALYST UNTUK MEMINIMALISIR KERUGIAN DI PT ASIA COLLECT INDONESIA - FLOW**

*Professional work is a mandatory subject that must be undertaken by undergraduate students. It aims to provide an overview of the actual work processes in real life. The purpose is to offer learning and opportunities for students to apply the knowledge acquired during their education at Pembangunan Jaya University to real-life situations. The Intern worked in the Risk Department at PT Asia Collect Indonesia. This department functions to analyse performance, predict, and minimize potential losses that could risk the company. The tasks performed by the Intern included examining the commission fees received by the company from partners in comparison to the data in the company's database, creating analytical reports on the operational department's performance to provide insights to the strategic department, generating ad-hoc analysis reports from other departments to provide insights using the data stored in the SQL Server database, and creating revenue forecast reports for the CEO and other higher-ups.*

**Keywords:** Risk, Risk Analyst, Strategy, Performance, Analysis, SQL Server
