

ABSTRACT

Yonas Abdi Dewanta (2020051001)

DEVELOPMENT OF MICRO MOBILITY VEHICLES IN SPORA EV

In carrying out professional work at PT. Spora Cahaya (Spora EV), the author works in the product designer division. During his professional work, the author was able to gain various kinds of knowledge taught such as design concept studies, use case studies, production processes, vehicle electrification, and design techniques. The most important thing in the learning that has been obtained is learning soft skills, such as working in a team, learning to make decisions, communicating, and doing things that must be done according to a timeline which is very useful in carrying out the work given.

Keywords: *Design Concept, Use Case, Vehicle Electrification, Production Process*
