

ABSTRACT

WEB-BASED EMPLOYEE PRESENCE INFORMATION SYSTEM USING QR CODE AT XYZ SHARIA BANK

¹⁾ Student of Information System Department, Universitas Pembangunan Jaya

²⁾ Lecturer of Information System Department, Universitas Pembangunan Jaya

The use of information system technology in attendance attendance which previously used a written recording system, several problems that will arise, namely loss of data and irregularity of attendance attendance records which makes it difficult to create summaries for reporting purposes. In making it easier to record leave, a web-based application that can be accessed online with regular data storage can make the process of recording absences better and make it easier and faster to create summaries or reports. Web-based employee registration information system using QR codes in managing information, continuing the process of recording messages made by employees and every data is properly recorded in the database. This application will speed up recording percentages quickly and can be accessed using PC hardware,
