***Implementation of waterfall method on Application Development SAKTI  
(Financial Application System for Agency Level)***

*Apprentice attend internship in PT Ogya Tekno Nusantara from 1 February 2024 until 30 April 2024 or 3 months. Apprentice was placed in Junior Software Specialist in SAKTI project. This project uses waterfall application development method which has stages: analysis requirement, design, implementation, testing, and maintenance. Apprentice had opportunity to create API, integrate backend with frontend, design UI, and also do bug fixing. Beside that, Apprentice also enrich knowledge about professional work culture, and technology to develop website.*

**Keywords:** *methods, development, application, waterfall*
