WEBSITE APPLICATION BACK-END DESIGN AT PT. BUMI REJEKI AGUNG

Professional work carried out at PT. Bumi Rejeki Agung which is a property company that is being built so that the company can run well, a promotion is needed. This website application design aims to be a promotional tool for PT. Bumi Rejeki Agung which is also useful for the wider community regarding property knowledge that is increasing and informative. Here, the practitioner serves as a backend developer in this professional work project where the practitioner designs one of the databases and CRUD for the admin. With this, practitioners can experience firsthand how companies work in the industrial world

Keywords*: website, property, application*
