ANALISIS REKAPITULASI *DAILY ACTIVITY* DAN PERHITUNGAN TARGET DI PT.KREDIVO FINANCE INDONESIA.

This professional work report provides a detailed overview of the research and analysis conducted during the professional work period at PT. Kredivo Finance Indonesia. The primary focus of the research is on the recapitulation system of daily activities and the calculation of Desk Collection targets, which is an integral part of the company's performance management. The research involves the collection of historical data, including daily activities such as daily payment amounts, total daily work, and the monthly target achievement of the team. These data are analyzed in detail to understand how the recapitulation system of daily activities impacts the achievement of the company's performance targets and strategic decision-making. This professional work report contributes to the company by reinforcing the role of the recapitulation system of daily activities and target calculation as effective tools in performance management and strategic planning. Additionally, the report reflects the experiences and learning gained during the professional work period in the rapidly evolving fintech industry in Indonesia.

Keywords: *Daily Activity, Desk Collection, PT.Kredivo Finance Indonesia*
