*The purpose of this research is to examine the influence of Net Profit Margin, Return On Asset, Current Ratio, and Debt To Equity Ratio on profit growth in transportation & logistics companies. The research period covers 5 years, from 2018 to 2022. The population of this study consists of 21 companies. A sample of 15 companies was selected using purposive sampling technique. Data analysis technique involves panel data regression analysis. The analytical tool used is Eviews 13 software. This research looks for variables that influence profit growth. Based on the results of research analysis, it was found that Net Profit Margin, Return On Assets, Current Ratio, and Debt To Equity Ratio together had an influence on profit growth. Return On Assets has a positive and significant effect on profit growth. Then, Net Profit Margin and Current Ratio have a negative and significant effect on profit growth. Meanwhile, the Debt To Equity Ratio does not have a significant effect on profit growth.*

*Keywords: Profit growth, Net Profit Margin, Return On Asset, Current Ratio, Debt To Equity Ratio*
