DEVELOPMENT OF LEAVE AND OVERTIME REQUEST FEATURES FOR MYSAU MOBILE APPLICATION BASED ON REACT NATIVE

PT Siaga Abdi Utama is a company established in 2011, specializing in Human Resources and consulting services for partner companies. The intern engaged in an internship at PT Siaga Abdi Utama from July 10, 2023, to October 10, 2023. The intern was assigned to the IT Team division to develop a mobile-based HRIS application feature. The developed features include leave and overtime requests for the MySAU application. The intern utilized the React Native framework and TypeScript for front-end development. The internship under the MBKM program provided the intern with valuable benefits, such as gaining practical experience in the industrial sector and enhancing programming skills.

Keywords: HRIS, React Native, TypeScript, Mobile Application
