

## ABSTRACT

### **JUDUL TUGAS AKHIR DALAM BAHASA INGGRIS**

Denisa Karina Wulandari.<sup>1)</sup>, Gandung Anugrah Kalbuadi, S.Ds., M.Ds.<sup>2)</sup>

<sup>1)</sup> Student of Visual Communication Design, Universitas Pembangunan Jaya

<sup>2)</sup> Lecturer of Visual Communication Design, Universitas Pembangunan Jaya

*The motivation behind this study is the negative impact that technology has had on people's desire to read the Quran, especially in light of how commonplace gadget use has become in contemporary society. By applying a Lean UX methodology, the study found a number of problems, including feature gaps and inadequate user interface design. The formulation of the problem entails creative solutions through the development of applications, highlighting the improvement of interest in reading the Quran, upgrading features, and designing a trend-aware interface that is responsive. Urban regions, data from the last five years, and the use of a qualitative approach are all included in the research restrictions. The main goals of the study are to identify ways to improve the Al Quran application's responsiveness, gauge its current level of responsiveness, and pinpoint areas that need improvement.*

**Key words:** *1<sup>st</sup> User Interface Design, 2<sup>nd</sup> Application Development, 3<sup>rd</sup> Interest in Reading Al Qur'an.*
