## WORKING ACTIVITIES IN MARKETING FIELD PT TRISJUNAR MEGA RADHA

While working professionally at PT Trisjunar Mega Radha, practitioners work under the supervision and guidance of PT Trisjunar Mega Radha, Practical Supervisors. Practitioners will know only during their professional activities that this will not be done in the field of marketing services of PT Trisjunar Mega Radha if the project has already been implemented. Therefore, practitioners do not market their services in their professional activities, but follow the instructions of the operations manager to create on-going project data and help them go straight to the field so that they can learn and share with the world. Allow direct involvement. Practitioners create data, participate in aircraft supervisor and assistant training, and participate as supervisors and assistants in the field of technicians.
