This research aims to analyze the influence of company growth, good corporate governance, and financial performance on company value. This research uses quantitative methods. The secondary data is in the form of annual reports of primary goods retail trade sub-sector companies listed on the Indonesia Stock Exchange for the 2018-2022 period. The results of this research show that company growth, independent board of commissioners, and audit committee do not have a significant effect on company value, while financial performance has a significant effect on company value. Simultaneously, the variables of company growth, independent board of commissioners, audit committee, and financial performance have a significant influence on company value.

Keywords: Company Growth, Good Corporate Governance, and Financial Performance, and Firm Value.
