PROCESS OF INPUTTING ACCOUNT PAYABLE USING SIMPRO SOFTWARE AT PT JAYA KONSTRUKSI MANGGALA PRATAMA, TBK

Advancements and dynamics in today's world require skills that are not only theoretical but also applicable. Therefore, an academic degree alone is not sufficient without practical experience in applying the theories learned during studies. One way to meet this challenge is through a professional internship. For example, Universitas Pembangunan Jaya provides its students with the opportunity to gain real insights into work situations and conditions through its work profession program. The intern carries out their professional practice at PT Jaya Konstruksi Manggala Pratama, Tbk., one of the Jaya Group companies located in Bintaro, South Jakarta. The intern is placed in the finance division. During the internship, the intern is tasked with creating Receipt Vouchers using the Simpro system. Through this task, the intern not only gains direct experience in financial administration but also a deeper understanding of how financial operations are managed within a large construction company. This task also serves as a means for the intern to hone the technical skills necessary for the professional world, as well as to provide insights into the importance of accuracy and precision in managing company finances.

Keywords: *Professional Internship, Receipt Voucher, Simpro*
