### ***DESIGNING A WEB THE CONTRIBUTION INDICATORS OF SCIENCE AND TECHNOLOGY, RESEARCH, AND INNOVATION AT BRIN***

*This Professional Work Report aims to fulfill the requirements of the Professional Work Course in the Department of Information Systems at Universitas Pembangunan Jaya. The objective of this dashboard design is to assist the National Research and Innovation Agency (BRIN) in efficiently analyzing data and supporting decision-making processes. The design process involves needs analysis, mockup creation, and implementation using Tableau as the primary design tool. The practitioner actively participated in all stages, from user needs analysis to prototyping. The resulting dashboard aims to present data related to the contribution of science and technology, research, and innovation in Indonesia, thereby enhancing public access to relevant information.*

**Keywords:** *Design, UI/UX, web, Science and Technology.*
