*This research aims to determine whether corporate culture and career development have an impact on the work of employees. This study uses a quantitative approach and primary data collection using questionnaires. Because the population in the study < 100 respondents, all employees of Herloom Hotel as many as 62 employees were determined as a sample by purposive sampling technique. Data analysis in this study using the SPSS 27 program, T test and F test measurements. The results of the T test obtained corporate culture (X1) has no effect on work performance (Y) is calculated at a significant value of T test < T table. While Career Development (X2) compared to the work (Y) is calculated at a significance value with results of T test > T table and has a positive direction.*

*Keywords: Corporate Culture, Career Development, Job Satisfaction, Herloom.*
